

Steps to Deeper Bible Study

1. Pray to begin.
2. Slow down.
3. Adjust what you're doing based upon which book of the Bible you are reading.
4. Ask "Why?" Allow your mind to think. Seek additional information.
5. Pay attention to details. Look for clarifiers, strengtheners, and descriptions.
6. Look for themes. Make note of any Old Testament passages referenced.
7. Understand the context, both as you begin a new book as well as while you're reading.
Look at what came before and what comes after.
8. Choose to memorize Scripture.
9. Look for connections. Look for the word "and" as well as commas. Pay attention to transitional words.
10. Put the focus back on God.
